## SKILLS

**Programming:** Java, Python
**Frontend:** HTML, CSS, JavaScript, React
**Backend:** Java, Spring Boot
**Database:** MySQL
**Core Concepts:** OOP, Data Structures and Algorithms (DSA)

## PROJECTS

**Digital DJ Stent Tracking System (StentCare)** 3 Months
**Tech Stack:** HTML, CSS, JavaScript, MySQL

- Developed a mobile application to manage patient records and track DJ stent insertion and scheduled removal dates.
- Designed a user-friendly interface to monitor stent status, upcoming removals, and overdue cases.
- Supported timely patient follow-ups through organized tracking of stent details and removal schedules.
- **GitHub:** StentCare Project

**Online Transaction Fraud Detection Using Machine Learning** 3 Months
**Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Studied and compared Random Forest, Naive Bayes, Logistic Regression, SVM, and Decision Tree algorithms for online transaction fraud detection.
- Used data preprocessing and classification techniques to identify potentially fraudulent transactions.
- Evaluated model performance using accuracy, precision, recall, and F1-score to compare classification effectiveness.

**Emergency Vehicle Traffic Control Using TCN and MARL** 2 Months
**Tech Stack:** Python, TCN, Multi-Agent Reinforcement Learning, TensorFlow/PyTorch, SUMO

- Explored Temporal Convolutional Networks (TCN) and Multi-Agent Reinforcement Learning (MARL) for emergency vehicle traffic control.
- Compared approaches for traffic signal coordination and emergency vehicle movement in simulated traffic conditions.
- Investigated strategies to reduce emergency vehicle delays and improve traffic flow efficiency.

## EXPERIENCE

**TAP Academy** *6 Months*
*Java Full Stack Developer Intern*

- Completed a six-month internship focused on Java full-stack application development.
- Gained practical exposure to frontend development, Java programming, database concepts, and application development workflows.

## ACHIEVEMENTS

- Earned the **Oracle Certified Professional: Java SE 17 Developer** certification.
- Completed NPTEL courses in **Software Testing** and **Internet of Things (IoT)**.
- Strengthened knowledge of Java programming, object-oriented programming, and software development fundamentals.
- Applied technical knowledge through academic projects involving healthcare tracking, machine learning, and traffic management.

## EDUCATION

**B.E. in Computer Science and Engineering** 2022 – 2026
SIMATS Engineering, Chennai, India CGPA: 7.93/10

**Intermediate – MPC** 2020 – 2022
Sri Chaitanya Junior College, Vijayawada, India 91.6%

**SSC** 2019 – 2020
Sri Chaitanya School, Kadapa, India 99.5%
